# CABLE PULLS TO EACH ROOM

Two XLR sends, one XLR return and one Cat5 per room. Every XLR end is soldered onto its cable: pull it, solder the room end, solder the rack end, then patch it (Cat5 ends are terminated instead). Sends land on the patch bay as TRS; the returns stay in a loom on the floor, so they have nothing to patch — **156** steps in all. The destination is where the cable lands at the rack.

Notes...

## TO DO

0 of 3 done

- ☐ Find the screws for all the cover plates
- ☐ Gather every cover plate in one place
- ☐ Work out which rooms are missing cover plates - Kitchen and Guest Bed are, the rest unknown

Anything else...
